Education

2003 - 2010   Faculdade de Ciências e Tecnologias da Universidade Nova de Lisboa

BSc in Computer Enginnering

Professional Experience

August 2009 until now   **Banco BAI Europa S.A.**

Função   Full Stack Developer / Team Leader

At BAI Europa I was part of the first development and maintenance team of the Bank. The transverse view that I've about the Bank, and the fact that the team always was independent regarding technologies and methods, made my technical skills grow in an exp onential way.
This experience reveals itself in the future when the interaction and integration with suppliers and regulators was needed. BAI had a lot of projects with external actors that became part of the day by day of the Bank.
With the constant grow in projects, the team had to grow in people and my functions in the department change to become a most oriented user in terms of teaching and leading the new members inside the projects, and inside the Bank itself. This role was given naturally and without indication from anyone, being the focal point of information for the team members and external actors.
With the constant grow in projects, the role of Project Manager was given gradually to small projects, and with the necessary confidence to major projects on the Bank.

Personal Skills

Mother Thongue   Portuguese

	Understanding		Spreaking		Writing
	Listening	**Reading**	**Interaction**	**Production**	
English	C1	C2	C1	C1	C1

Levels: A1 and A2: Basic user - B1 and B2: Independent user - C1 and C2: Proficient user
Common European Framework of Reference for Languages

Competências de programação	- JAVA EE and SE applications (1.6,1.7,1.8) - WS SOAP - JSF - ETL - Microsoft Integration Services - iSeries RPG - Frontends PHP - Jasper Reports
Major Projects	- Banking payment system with direct integration with the core banking (trough API), SWIFT message reception and dispatch, report generation. All the integration with the front end made through SOAP Web Services - Integration system with the core banking. API system of externalization of API. - Autonomous system to process files from various suppliers and direct integration with the core system
Principais competências	- Full stack developer - Analysis - design - development - Team Leader - Project Manager - System Administrator - Windows - Linux - VMWare ESXI
Additional Info Courses	- Initiating and Planning Projects - University of California - Scrum Master certification preparation - uDemy
Technologies	- JAVA SE e EE 1.6, 1.7, 1.8 - SQL - DB2, SQL Server 2008, 2010, 2016, MySQL, MongoDB - MS SSIS, MS SSAS - Jasper Reports - iSeries V6, V7 - Certent CDM - VMWare - Windows Server - Ubuntu Server - Subversion - GIT
